Operate from the console (UX)

1. Open this route from the nav or command palette and wait for live API data.
2. Use filters/search when present; drill into a row for detail.
3. For mutating actions: confirm role gates and impact before applying.
4. **Empty / fail:** Check service health, auth, and that required CRDs/backends for this domain are installed.
5. **Success:** Live data loads; created/updated objects appear without error toasts.
